20 **Introduction**

21 Iowa State University's Acceptable Use of Information Technology Resources policy (AUP) provides
22 for access to information technology (IT) resources and communications networks within a culture of
23 openness, trust, and integrity. In addition, Iowa State University is committed to protecting itself and
24 its students, faculty, and staff from unethical, illegal, or damaging actions by individuals using these
25 systems.

26 **1. Purpose**

27 The purpose of this policy is to outline the ethical and acceptable use of information systems at Iowa
28 State University. These rules are in place to protect students, faculty, and staff; i.e., to ensure that
29 members of the Iowa State University community have access to reliable, robust IT resources that are
30 safe from unauthorized or malicious use.

31 Insecure practices and malicious acts expose Iowa State University and individual students, faculty,
32 and staff to risks including virus attacks, compromise of network systems and services, and loss of data
33 or confidential information. Security breaches could result in legal action for individuals or the
34 university. In addition, security breaches damage the university's reputation and could result in loss of
35 services. Other misuses, such as excessive use by an individual, can substantially diminish resources
36 available for other users.

37 [top](#)

38 **2. Scope**

39 The AUP is an integral part of IT security policies and applies to faculty, staff, and students as well as
40 any other individuals or entities who use information and IT resources at Iowa State University. This
41 policy applies to all IT resources owned or leased by Iowa State University and to any privately owned
42 equipment connected to the campus network and includes, but is not limited to, computer equipment,
43 software, operating systems, storage media, the campus network, and the Internet.

44 Securing and protecting these significant and costly resources from misuse or malicious activity is the
45 responsibility of those who manage systems as well as those who use them. Effective security is a team
46 effort involving the participation and support of every member of the Iowa State University
47 community who accesses and uses IT resources. Therefore, every user of Iowa State University's IT
48 resources is required to know the policies and to conduct their activities within the scope of the AUP,
49 the Iowa State University **Information Technology Security policy**, and the **Policies, Standards, and**
50 **Guidelines for IT Security** (see Resources below). Failure to comply with this policy may result in
51 loss of computing privileges and/or disciplinary action.

52 **3. Policy Statement**

53 Unless otherwise specified in this policy or other university policies, use of university information
54 technology resources is restricted to purposes related to the university's mission. Eligible individuals
55 are provided access in order to support their studies, instruction, duties as employees, official business
56 with the university, and other university-sanctioned activities. Individuals may not share with or
57 transfer to others their university accounts including network IDs, passwords, or other access codes
58 that allow them to gain access to university information technology resources.

59 Colleges, departments, and other administrative units have considerable latitude in developing
60 complementary technology use policies and procedures, as long as they are consistent with this policy
61 and any other applicable technology use policies of the university.

62 Incidental personal use of information technology resources must adhere to all applicable university
63 policies. Refer to **Personal Use and Misuse of University Property policy** (see Resources below).
64 Under no circumstances may incidental personal use involve violations of the law, interfere with the
65 fulfillment of an employee's university responsibilities, or adversely impact or conflict with activities
66 supporting the mission of the university.

67 [top](#)

68 **4. Unacceptable Use**

69 Users are prohibited from engaging in any activity that is illegal under local, state, federal, or
70 international law or in violation of university policy. The categories and lists below are by no means
71 exhaustive, but attempt to provide a framework for activities that fall into the category of unacceptable
72 use.

73

74 **4.1. Excessive Non-Priority Use of Computing Resources**

75 Priority for the use of IT resources is given to activities related to the university's missions of teaching,
76 learning, research, and outreach. University computer and network resources are limited in capacity
77 and are in high demand. To conserve IT resource capacity for all users, individuals should exercise
78 restraint when utilizing computing and network resources. Individual users may be required to halt or
79 curtail non-priority use of IT resources, such as recreational activities and non-academic, non-business
80 services.

81 **4.2. Unacceptable System and Network Activities**

82 Unacceptable system and network activities include:

83 **4.2.1.** Engaging in or effecting security breaches or malicious use of network communication
84 including, but not limited to:

85 **4.2.1.1.** Obtaining configuration information about a network or system for which the user does not
86 have administrative responsibility.

87 **4.2.1.2.** Engaging in activities intended to hide the user's identity, to purposefully increase network
88 traffic, or other activities that purposefully endanger or create nuisance traffic for the network or
89 systems attached to the network.

90 **4.2.1.3.** Circumventing user authentication or accessing data, accounts, or systems that the user is not
91 expressly authorized to access.

92 **4.2.1.4.** Interfering with or denying service to another user on the campus network or using university
93 facilities or networks to interfere with or deny service to persons outside the university.

94 [top](#)

95 **4.3. Unauthorized Use of Intellectual Property**

96 Users may not use university facilities or networks to violate the ethical and legal rights of any person
97 or company protected by copyright, trade secret, patent, or other intellectual property, or similar laws
98 or regulations. Violations include, but are not limited to:

99 **4.3.1.** Except as provided by fair use principles, engaging in unauthorized copying, distribution,
100 display, or publication of copyrighted material including, but not limited to, digitization and
101 distribution of photographs from magazines, books, or other copyrighted sources; copyrighted music or
102 video; and the installation of any copyrighted software without an appropriate license.

103 **4.3.2.** Using, displaying, or publishing licensed trademarks, including Iowa State University's
104 trademarks, without license or authorization or using them in a manner inconsistent with the terms of
105 authorization.

106 **4.3.3.** Exporting software, technical information, encryption software, or technology in violation of
107 international or regional export control laws.

108 **4.3.4.** Breaching confidentiality agreements or disclosing trade secrets or pre-publication research.

109 **4.3.5.** Using computing facilities and networks to engage in academic dishonesty prohibited by
110 university policy (such as unauthorized sharing of academic work or plagiarism).

111 **4.4. Inappropriate or Malicious Use of IT Systems**

112 Inappropriate or malicious use of IT systems includes:

113 **4.4.1.** Setting up file sharing in which protected intellectual property is illegally shared.

114 **4.4.2.** Intentionally introducing malicious programs into the network or server (e.g., viruses, worms,
115 Trojan horses, email bombs, etc.).

116 **4.4.3.** Inappropriate use or sharing of university-authorized IT privileges or resources.

117 **4.4.4.** Changing another user's password, access, or authorizations.

118 **4.4.5.** Using an Iowa State University computing asset to actively engage in displaying, procuring, or
119 transmitting material that is in violation of sexual harassment policy or laws, hostile workplace laws,
120 or other illegal activity.

121 **4.4.6.** Using an Iowa State University computing asset for any private purpose or for personal gain.

122 [top](#)

123 **4.5. Misuse of Electronic Communications**

124 Electronic communications are essential in carrying out the activities of the university and to
125 individual communication among faculty, staff, students, and their correspondents. Individuals are
126 required to know and comply with the university's policy on **Mass Email and Effective Electronic**
127 **Communication** (see Resources below).

128 Key **prohibitions** include:

129 **4.5.1.** Sending unsolicited messages, including "junk mail" or other advertising material, to individuals
130 who did not specifically request such material, except as approved under the policy on Mass Email and
131 Effective Electronic Communication.

132 **4.5.2.** Engaging in harassment via electronic communications whether through language, frequency, or
133 size of messages.

134 **4.5.3.** Masquerading as someone else by using their email or internet address or electronic signature.

135 **4.5.4.** Soliciting email from any other email address, other than that of the poster's account, with the
136 intent to harass or to collect replies.

137 **4.5.5.** Creating or forwarding "chain letters" or solicitations for business schemes.

138 **4.5.6.** Using email originating from Iowa State University provided accounts for commercial use or
139 personal gain.

140 **4.5.7.** Broadcasting e-mail from a university account to solicit support for a candidate or ballot
141 measure, or otherwise using e-mail systems in a concerted effort to support a candidate or ballot
142 measure.

143 **5. Enforcement**

144 The Acceptable Use of Information Technology Resources policy is enforced through the following
145 mechanisms.

146 **5.1. Interim Measures**

147 The university may temporarily disable service to an individual or a computing device, when an
148 apparent misuse of university computing facilities or networks has occurred, and the misuse:

149 **5.1.1.** Is a claim under the Digital Millennium Copyright Act (DMCA)

150 **5.1.2.** Is a violation of criminal law

151 **5.1.3.** Has the potential to cause significant damage to or interference with university facilities or
152 services

153 **5.1.4.** May cause significant damage to another person

154 **5.1.5.** May result in liability to the university

155 An attempt will be made to contact the person responsible for the account or equipment prior to
156 disabling service unless law enforcement authorities forbid it or Information Technology Services staff
157 determine that immediate action is necessary to preserve the integrity of the university network. In any
158 case, the user shall be informed as soon as possible so that they may present reasons in writing why
159 their use is not a violation or that they have authorization for the use.

160 [top](#)

161 **5.2. Suspension of Services and Other Action**

162 Users may be issued warnings, may be required to agree to conditions of continued service, or may
163 have their privileges suspended or denied if:

164 **5.2.1.** After hearing the user's explanation of the alleged violation, an IT provider has made a
165 determination that the user has engaged in a violation of this code, or

166 **5.2.2.** A student or employee disciplinary body has determined that the user has engaged in a violation
167 of the code.

168

169 **5.3. Disciplinary Action**

170 Violations of the Iowa State University Acceptable Use of Information Technology Resources policy
171 may be referred for disciplinary action as outlined in the Student Disciplinary Regulations and
172 applicable faculty and staff handbooks or collective bargaining agreement. The university may assess
173 a charge to offset the cost of the incident.
